ARMS AND SECURITY

XVII INTERNATIONAL EXHIBITION

April 27 – 30, 2021

Arms and Security International Exhibition has already become a notable event in defense industry and is gaining a leading position among similar events in Eastern Europe.

In recent years, security and defense sector of Ukraine has gained invaluable **experience that should be taken into account** by all the countries in Europe and the world. Ukraine has confidently resumed its presence in the international defense market, and, along with ensuring its own needs, it has established military-technical cooperation with a number of countries on the basis of collaboration, joint activities and partnership.

Today, **defense industry reform is a hot topic**, as it should lay the foundations for further development of high-tech production facilities.

In general, the **main priorities in the defense industry** remain unchanged, namely: revival and development of infrastructure facilities; purchase, modernization and repair of weapon systems and military equipment; acquisition of the necessary capabilities that meet the criteria for NATO membership. Within three following years, it is planned to create all-sufficient Maritime Guard capable of effectively protecting maritime borders and adequately countering challenges of the transnational and illegal nature.

AVIASVIT-XXI

XII INTERNATIONAL AVIATION AND SPACE SALON

April 27 – 30, 2021

Strategic partner 

AVIASVIT XXI International Aviation and Space Salon and Arms and Security International Exhibition are held jointly not by chance. Ukraine is one of the few countries with its own aerospace industry, and both the development and current state of this industry are closely related to the development of the defense industry and directly affect the country's defense capabilities.

AVIASVIT XXI International Aviation and Space Salon is a unique exhibition event in Ukraine, which showcases modern aviation and space technology. Aviasvit-XXI presents the latest achievements and provides new prospects in the field of international cooperation for the implementation of large-scale aviation and space projects, and also contributes to the promotion of Ukrainian products in the world market.
